# INTRODUCTION

Teacher's handbook How to use innovated language portfolio – Romani language learning (hereinafter Teacher's handbook) was developed within international project ERASMUS+ named "**Innovation of Romani language didactics for inclusive education of pupils from a disadvantaged environment**".

It is designed for teachers and future teachers of Romani language. The purpose of the Handbook is to provide Romani language teachers with a common basis for preparing school educational program, thematic educational plans, preparation of Romani language lessons, textbooks and other didactic tools. The Handbook contains a general description of Innovated framework educational program of Romani language according to language levels A1, A2, B1, B2. Other chapters are based on experience and knowledge obtained by schools during Romani language instruction and implementation of Innovated framework educational programs in school year 2017/2018. The Handbook offers proposals of activities which can be modified by the teacher at Romani language lessons, proposals of exercises to practice grammar and lexis, proposals of texts to practice oral skills – reading, proposals how to work with text, proposals of preparations for lessons and proposals to develop thematic educational plans according to Framework educational program of Romani language study. Proposed teaching material can be freely used during Romani language lessons. Thematic educational plans for Romani language are adjusted by teacher according to the number of language lessons per week and according to achieved language level of pupils.

We believe that Teacher's handbook will be useful and will help primarily beginning teachers to prepare necessary study and pedagogical materials for Romani language instruction in primary and secondary schools.

## I. Description of innovated framework educational programs of Romani language

Innovated framework educational program is a pedagogical document which specifies a framework scope of education in Romani language. The program determines general objectives and key competences at which education in Romani language should aim. Program objectives are set in a way to ensure a balanced development of pupil's personality. It contains requirements for Romani language teaching of pupils who do not speak Romani language at home, pupils who do not speak Romani language fluently, but hear it from their parents or grandparents and pupils who speak Romani language fluently, but need to develop their skills to use the language as an instrument of formal education. Innovated framework educational programs for individual language levels A1, A2, B1, B2 have the same structure.

- 1. Goals of subject** for respective level of education
- 2. Description of subject** for respective level of education
- 3. General competences**
- 4. Communication and language competences** which consist of the following elements:
  - language competences;
  - sociolinguistic competences;
  - pragmatic competences;
  - intercultural communicative competences.
- 5. Content standard** includes recommended thematic units and subthemes. The order of thematic units is not binding. Teacher may also modify subthemes within thematic units according to the nature of the given group of pupils and chosen study material.
- 6. Performance standard determines requirements related to communication language activities and strategies:**  
Listening comprehension, reading comprehension, oral expression – monologue, oral expression – dialogue, written expression which should be achieved by pupils at the end of the respective level of education.
- 7. Selected recommended lexis and communication competences** give a good picture of what pupil should master in terms of lexis and grammar at the end of respective level of education.

## **1 *Innovated framework educational program of Romani language for primary education, level A1***

Main goals:

- to raise interest in Romani language and to develop a relationship with the language as one of the languages forming part of common European cultural and linguistic heritage;
- to acquire basic rules of orthography in Romani language, skill and habit, to use them correctly in written expression;
- to support and develop expression skills of pupils;
- to contribute to overall development of pupil's personality.

**In terms of general competences** pupils should acquire effective learning strategies, focus on reception, acquisition and sorting of information; repeat acquired knowledge and supplement it.

**In terms of language competences** pupils should master basic vocabulary within specified thematic units, know pronunciation of Romani sounds which do not exist in Slovak (aspirants čh, kh, ph, th).

**In terms of sociolinguistic competences** pupils should be able to establish a basic social conversation using most simple ways how to express politeness: to greet, to answer a greeting, to say goodbye, to introduce oneself, to thank, to apologize etc.; to ask questions including: *What's your name?/Sar tut vičines?, Where do you come from?/Khatar sal?, How are you?/Sar sal?, Sar san?, Where do you live?/Kaj bešes?, Kaj bešen?, What's new?/So hin tut nevo?, So hin tumen nevo?*

**In terms of pragmatic competences** pupils can connect letters, words, or groups of words with help of linking words, e.g. „the/u“, „abo/vaj“, „hoj/kaj“.

## **Primary education (1<sup>st</sup> stage primary school)**

**Educational content includes 11 thematic units:**

- Me/my family
- House, flat/activities
- My community
- Romani crafts and professions
- Holidays and celebrations
- In school/in classroom
- Travel and transport
- Food and clothing
- Time, seasons and weather
- Nature and animals
- Leisure time, hobbies

### **Performance standard**

#### **Listening comprehension**

Pupil can recognize and understand known words and most basic phrases which concern his/her personal situation and immediate specific surroundings.

#### **Reading comprehension**

Pupil can recognize and understand known words and simple sentences with the same limited scope as for listening. He/she can communicate orally in simple fashion.

#### **Oral expression – monologue**

Pupil at language level A1 can describe people he/she knows using simple phrases, as well as the place in which he/she lives.

#### **Oral expression – dialogue**

Pupil at language level A1 can make himself/herself understood in a simple way, if his/her partner is willing to repeat his/her statement more slowly, or to reformulate it. He/she can ask simple questions and answer similar questions concerning his/her basic needs.

#### **Written expression**

Pupil can write a simple, short text (a short postcard or explanation to picture) and fill out a form containing personal data. In case it concerns children at early school age, writing is limited to copying of words and phrases from blackboard and naming subjects in pictures.

## **2 *Innovated framework educational program of Romani language for lower secondary education, language level A2***

Main goals:

- to support a more open approach to people, increase of inter-ethnic acceptance and tolerance;
- to support a more open approach to the need and necessity to maintain and study Romani language with the aim to preserve Romani identity;
- to process a spoken or written text as a listener or reader in receptive language activities (listening comprehension, reading comprehension);
- to create an oral or written text within productive and interactive language activities and strategies (oral expression, written expression).

**In terms of general competences pupil can:**

- exchange information and ideas with young people and adults and express his/her ideas and feelings to them;
- successfully handle various life (personal, work, social) situations;
- to react adequately in a certain situation and to activate appropriate activity, to give a reasonable opinion.

**In terms of language competences pupil can:**

- use basic sentence models and communicate using learned phrases and groups of some specific Romani words and expressions on topics concerning own person and other people, their activities, places and things they own etc.;
- distinguish synonyms in various dialects;
- use vocabulary to his/her their way in various actions related to known situations and topics.

**In terms of sociolinguistic competences pupil can:**

- communicate in common social situations;
- express oneself in a simple fashion with help of basic language functions, including for instance exchange of information, request, simple expression of one's own opinions and attitudes, invitation, apology etc.;
- sustain and develop basic social conversation using simple common expressions.

**In terms of pragmatic competences pupil can:**

- use simple means of expression to start, sustain and close a short conversation;
- formulate his/her ideas in line with requested strategy (intention, topic, logical sequence);
- use basic functions of language with the aim to provide and search information, express and detect attitude, express conviction, establish contact with people;
- use most frequent linking words to link simple sentences necessary to tell or describe a story in a logical time sequence;
- use functionally basic language tools to obtain information, to express simple rejection, desire, intention, satisfaction, interest, surprise, disenchantment, fear.

**In terms of intercultural communicative competences pupil can:**

- get to know differences in way of life of Roma living in Slovakia (rumungri – Slovak Roma, Hungarian Roma, Olas Roma) through Romani language, know basic differences in Romani dialects, but also differences in their cultural traditions;
- speak about livelihood of Roma in the past and presence and know intercultural differences;
- assess critically products of one's own culture and other cultures;
- speak about Roma habits and traditions at the occasion of holidays Christmas, Easter and important life events and compare them with other cultures.

### **Lower secondary education (2<sup>nd</sup> stage primary school)**

**Educational content consists of 11 thematic units**

Family and society

Our home

Human body, care for health

Man on travels

Education

Romani crafts and professions

Man and nature

Leisure time, hobbies

Nourishment and health

Holidays and celebrations

Clothing and fashion

## Performance standard

### Listening comprehension

Pupil is able to understand more and more common phrases and words with a high frequency, mainly if they have an immediate personal meaning to him/her. He/she is able to understand main points of narration, stories, legends within covered thematic units, e.g. daily household activities, way of Roma travelling in the past, traditional Romani crafts, Romani habits and traditions related to holidays etc.

### Reading comprehension

Pupil can read and understand short, simple texts, stories and also more extensive texts within covered thematic units, for instance more extensive texts from the life of Romani children, from life of Romani family and community; a simple text which describes daily activities in household, simple text which describes crafts, or activities of Roma in the past, simple text about Roma clothing in the past etc.

### Oral expression – monologue

Pupil is able to use phrases and sentences to provide a simple description of his/her family and other people, domicile, school and his/her favourite hobbies. He/she can talk about diseases and their prevention using simple sentences, he/she can describe school system in Slovakia, describe favourite weather, season, animals which he/she likes, describes sport disciplines; describe a special celebration at home, describe favourite clothing.

### Oral expression – dialogue

Pupil is able to perform simple and routine tasks which include a direct exchange of information and can engage into a very short social conversation. Within thematic units he/she can ask and answer simple questions about family, home, its surroundings and flat/house furnishing. He/she can give simple answers to questions about holidays, or opportunities which are important for his/her family, or community etc.

### Written expression

Pupil can write short simple announcements and a simple personal letter. Within thematic units he/she can describe family and daily activities in the family, write a short text about healthy life style, individual types of transport, school which he/she visits, favourite animal etc.

## **3 *Innovated framework educational program of Romani language for higher secondary education, language level B1***

### Main goals:

- to use communication language competences to implement communication purpose in a defined manner;
- to process spoken or written text as a listener, or reader in receptive language activities and strategies (listening comprehension, reading comprehension);
- to create an oral or written text in productive and interactive language activities and strategies;
- to use spoken and written texts in communication situations for specific functional goals.

### **General competences include the following pupils' skills:**

- to resolve daily life situations;
- to exchange information and ideas with young people and adults who speak the given language and describe their thoughts and feelings to them;
- to think critically – to find and select information while using various skills and critical approach;
- to think creatively – to find new ways of connecting facts in the process of problem resolution;
- to analyse facts and problems in connection with needs of others and society as a whole.

### **Language competences include the following pupils' skills:**

- to use basic sentence models and communicate via learned phrases and groups of some specific Romani words and expressions on topics concerning one's own person and other people, their activities, places and things they possess etc.;
- to distinguish various dialectic synonyms;
- to use vocabulary to cope with daily actions concerning known situations and issues.

**Sociolinguistic competences include the following pupils' skills:**

- to react correctly in various common social communication situations;
- to express a wide scale of language functions in communication including for instance exchange of information, request, simple expression of one's own opinions and attitudes, invitation, apology etc.;
- to know common phraseological expressions, sayings and proverbs;
- to know differences between formal and informal expression;
- to sustain and develop basic social conversation using simple common expressions.

**Pragmatic competences include the following pupils' skills:**

- to start, maintain and close a simple, personal and direct conversation concerning common topics, or personal interests;
- to participate in a discussion on a known topic, using appropriate expressions, to take the floor in line with communication habits of Romani society;
- to use conventional communication styles more deeply than at language level A2 in line with corresponding communication situation.

**Intercultural communication competences include the following pupils' skills:**

- to communicate with representatives of other cultures, developing, thus, one's intercultural competences;
- to communicate with representatives of other socio-cultural groups and to improve relations between majority and minorities from an overall perspective;
- to use empathy when getting to know situation of people from other cultures;
- to understand situations of people living in difficult life conditions and to get to know causes of these situations;
- to form one's own opinion mainly on the basis of own experience with foreigners;
- to show solidarity to people living in other conditions;
- to assume responsibility for oneself in the areas in which one lives.

**Higher secondary education  
(vocational schools and grammar schools)**

**Educational content consists of 11 thematic units**

Me and my family  
Home and housing  
Work and employment  
Leisure time and its organization  
Nature  
Travelling  
Clothing  
Care for health  
Arts, science and technology  
Education  
Romani language as a literary language

**Performance standard**

**Listening comprehension**

Pupil can understand main ideas expressed in standard language on known topics which he/she regularly encounters at work, at school, in free time etc. He/she can understand main ideas articulated in standard language on known topics he/she regularly encounters at home, at school, in leisure time etc. He/she can understand specific information and capture a logical structure of text, distinguish important from unimportant information. He/she can understand a story or a short narration about daily life of Roma in the past and presence. He/she can understand texts within thematic units, e.g. about shopping possibilities, services, advantages and disadvantages of living in town and in the country, school system in Slovakia etc.

**Reading comprehension**

Pupil can read and understand more extensive texts, stories, fairy tales within thematic units, e.g. about family and challenges faced by national minorities, significant personalities of Roma origin, Roma travels, dishes, drinks, foods, healthy lifestyle and nourishment, Roma clothing in the past and presence, most frequent diseases, accidents, health problems and their prevention etc.

### **Oral expression – monologue**

Within thematic units pupil can for instance speak briefly about its home and important rules and activities of family, speak briefly about foods at home, to speak about reasons of diseases which currently occur in segregated Roma communities, speak about traditional Roma crafts and current professions of Roma, tell a story related to a specific event, celebration or commemorative celebration, describe how guests and visitors are received in their home etc.

### **Oral expression – dialogue**

Pupil can engage in a conversation on known topics without preparation. He/she can start, sustain and close a simple direct conversation on topics which are known to him/her, or which are of specific interest to him/her. He/she can express himself/herself and react to feelings, such as surprise, happiness, sadness, interest, lack of interest and express conviction, agreement and disagreement in a polite way. He/she can clearly express his/her opinions and reactions concerning resolution of problems or practical issues about where to go, what to do, how to organize a certain event. He/she can ask questions and give answers to questions concerning a wide variety of known topics (family, home, parents' activities, interests, school, nature etc.).

### **Written expression**

Pupil can write main ideas or information from a heard or read text. He/she can write a coherent text (story, narration, description) about life of Roma community. He/she can write a CV, short announcement, notice, message, apology, a simple coherent text, in which he/she describes a person (friend, family member etc.). Within thematic units he/she can write a short coherent text, in which he/she describes a place in which he/she lives, favourite activity, life of a known Roma personality, traditions and habits in family, importance of protection of nature and environment etc.

## **4 *Innovated framework educational program of Romani language for higher secondary education, language level B2***

Main goals:

- to use efficiently general competences which are not characteristic for language, but necessary for various activities including language activities;
- to use communication language competences to implement communication purpose in a defined manner;
- to process spoken or written text as a listener, or reader in receptive language activities and strategies (listening comprehension, reading comprehension);
- to create an oral or written text in productive and interactive language activities and strategies;
- to use spoken and written texts in communication situations for specific functional goals.

**General competences include the following pupils' skills:**

- to resolve daily life situations;
- to exchange information and ideas with young people and adults who speak the given language and describe their thoughts and feelings to them;
- to think critically – to find and select information while using various skills and critical approach;
- to think creatively – to find new ways of connecting facts in the process of problem resolution;
- to analyse facts and problems in connection with the needs of others and society as a whole.

**Language competences include the following pupils' skills:**

- to explain and defend one's opinions in a discussion while using a relevant explanation, arguments and comments;
- to participate actively in an informal discussion in a known context;
- to comment, formulate clearly one's opinions;
- to converse naturally, fluently and efficiently;
- to lead a common conversation with native speakers without increased efforts from the side of any participant in the interaction;
- a relatively good command of grammar. He/she does not make mistakes which would lead to misunderstandings and he/she can correct most of his/her mistakes;
- to create a clear, understandable coherent written text which follows a standard structure and division into paragraphs.

**Sociolinguistic competences include the following pupils' skills:**

- to react correctly in various common social communication situations;
- to express oneself with confidence, understandably and politely in formal and informal functional styles which correspond given situation and persons;
- to communicate with native speakers and to behave in line with social and cultural conventions of the given language community (showing respect to elderly persons);
- to express oneself appropriately in a specific situation and to avoid serious mistakes in formulations;
- to adjust one's language expression to situation and recipient of information;
- to become aware of most significant differences in habits, common language practice, attitudes, values and convictions which are dominant in the given community and typical for his/her language background.

**Pragmatic competences include the following pupils' skills:**

- to use functionally language tools to gain information, to express attitudes (agreement, disagreement), modality (obligation, ability), will (desire, intention), emotions (joy, satisfaction, unwillingness, interest, surprise, disenchantment, fear), ethical principles (apology, regret, pity, agreement, disagreement, greeting, expression of respect, request, rejection);
- to adjust one's expression, means of expression to situation and recipient and to choose an appropriate level of formality which corresponds to the given circumstances;
- to engage in a discussion on a known topic, while he/she uses appropriate expressions to take the floor;
- to start, maintain and close communication with help of effective interchange with partner;
- to use effectively various linking words to express relations between individual thoughts;
- to communicate fluently with native speakers to such an extent that communication is not a burden for any of the party.

**Intercultural communication competences include the following pupils' skills:**

- to communicate with representatives of other cultures, developing, thus, one's intercultural competences;
- to communicate with representatives of other socio-cultural groups and to improve relations between majority and minorities from an overall perspective;
- to use empathy when getting to know situations of people from other cultures;
- to understand situations of people living in difficult life conditions and to get to know causes of these situations;
- to form one's own opinion mainly on the basis of own experience with foreigners;
- to show solidarity to people living in other conditions;
- to assume responsibility for oneself in the areas in which one lives.

## **Performance standard**

Language level B2 is described as independent user. When it comes to drafting of school educational program of Romani language at the level B2, it is expected that pupils achieved lower communication levels in previous education.

Pupils at the level B2 are able to sustain conversation in various contexts.

### **Listening comprehension**

Pupil at the level B2 is able to understand more extensive parts of speech which contain complicated arguments.

### **Reading comprehension**

He/she can read and understand texts describing situations and events in language with a high frequency of known words.

### **Oral expression – monologue**

During oral expression he/she can make a clear, detailed description, express his/her opinion, summarize opinions of others and assess advantages and disadvantages. Pupil at language level B2 possesses a sufficient scale of language means to provide clear descriptions and express his/her attitudes and opinions. He/she has a sufficient vocabulary which will allow him/her to talk about very general topics, but also about his/her own specialized interests.

### **Oral expression – dialogue**

Pupil engages with confidence in conversation without preparation. Regular interaction with native speakers occurs without major problems.

### **Written expression**

Pupil can write main ideas or information from a heard or read text. He/she can write a coherent text (story, narration, description) about life of Roma community. He/she can write a CV, short announcement, notice, message, apology, a simple coherent text, in which he/she describes a person (friend, family member etc.). Within thematic units he/she can write a short coherent text, in which he/she describes a place in which he/she lives, favourite activity, life of a known Roma personality, traditions and habits in family, importance of protection of nature and environment etc.

## **II. How to work with Innovated framework educational program of Romani language**

The purpose of the Innovated framework educational program of Romani language is to provide Romani language teachers with a common basis for preparation of school educational programs, thematic educational plans, for preparation of Romani language lessons, textbooks and other didactic tools.

Prior to the preparation of school educational program it is necessary to identify target group – know age and sociolinguistic context. We also need to take into account institutional limitations which will be related to the instruction of Romani language – number of lessons per week, number of school years. In the beginning we determine the level of language proficiency of pupils which we want to achieve at the end of respective stage of education.

School education programs should define realistic and achievable goals. For instance, in a program designed for children at an early school age, reading and writing will only play a minor role. On the other side, if our goal is to develop pupils' skills related to Romani language use as education tool, we shall rather focus on highlighting productive activities – speaking and writing.

We can further come to thematic units and topics which can help us to define in more detail the content of school educational program. If we prepare a school educational program which will run from the beginning until completion of primary school education and pupils had no other contact with Romani language before, we can decide to use all eleven thematic units. It is our objective that pupils acquire such a language proficiency which will be in close contact with Roma culture. However, we must not forget that writing and reading will not play such a central role as listening and oral expression in early stages. If we create school educational program focused on pupils who use Romani language at home, but need to deepen their communication skills in relation to education process, we may decide to use only some thematic units and focus more or less exclusively on using Romani language in education process.

With a view to pupils' age, areas and thematic units of the program we can specify vocabulary and grammar which pupils need to master to be able to achieve defined communication goals. In selection and preparation of materials and lessons we can use check lists in language portfolios which are accompanying documents to Innovated framework educational programs of Romani language developed according to language levels A1, A2, B1, B2 (adapted CFR, 2008, p. 12 – 13).

## **1 Proposed working methods for Romani language lessons**

Modern teaching methods include for instance audio-linguistic, audio-visual, situational, communication, group methods and other methods. **Audio-linguistic method** is based on learning the structure of the language on the basis of analogy when listening to the teacher. The aim is to use this structure in communication with native speakers. Pupil is passive, he/she learns while listening to various dialogues. The aim of **audio-visual method** is to react fast to various communication situations with focus on oral expression. Teacher uses various visual materials: pictures, films or presentations. **Situational teaching method** also emphasizes oral expression, pupil is, however, more active, creating own dialogues on the basis of examples. The aim of **communication method** is to manage communication with native speakers while developing all four speaking skills, pupil is active and his/her participation in communication is required. **Group method** is based on social relations between pupils, they learn what is subject of their interest. Teacher acts as an assistant during translation, everything else depends on the pupils.

It is important to activate pupils in teaching process, which means to guide pupils to active participation in teaching process so that the pupil is not just an object of instruction, but becomes its subject. Tools of pupils' activation include for instance problem method when introducing grammar element, situational method during conversation, using visual, auditory aids and subjects, collective forms of work (group narrations, group work, or work in pairs), language games and competitions.

Many language exercises can be done in form of games or playful activities which draw from competitive nature of pupils. Pupils are, thus, fully activated and motivated during the works.

**Language game** is based on the principle of didactic game. Methodological preparation of the game includes first of all setting out of goals, diagnosis of pupils' preparedness, afterwards it is necessary to clarify rules of the game, to determine way of assessment. Moreover, it is necessary to find an appropriate place, to prepare aids and materials, to determine time limit and consider further modifications and adjustments of the game. Games increase interest in learning, acquired knowledge is more permanent, pupils deepen their communication skills, develop fantasy and creativeness. During games focus is laid on activity and autonomy of pupils. Language game can focus on different areas in terms of Romani language teaching (e.g. vocabulary, independent oral expression etc.).

## **2 Description of key competences**

It is necessary to create an appropriate environment and conditions for effective development of key competences that means active instruction when pupils perform most of the work. The teaching process should contain three learning phases. The first phase is **evection** in which pupils evoke what they know about the topic, the second phase is awareness of meaning when pupils change the scheme of their knowledge (supplement new information) and the third phase is **reflexion** when pupils realize what they have learned. The phase **reflexion** is often omitted in instruction even though this phase seems to be most important with regard to realization of development of the given competence.

If pupil does not reflect new things he/she has learned, there is no conscious development of any competence. The reflection face should, therefore, be a part of Romani language instruction.

The main goal of **learning competences** is to guide pupils to develop further their skills, to acquire new knowledge through self-learning etc. also after completion of mandatory school attendance. In order to do that pupil needs to know to choose what to learn, to plan the learning activity and, subsequently, to check whether the goal has been achieved. During instruction it is therefore good to guide pupils to assume responsibility for what they learn and to be able to assess their own performance.

An appropriate method is to manage pupils' portfolio in which pupil would summarize all his/her works (work letters, written papers etc.), and after some time period (e.g. after covering one unit) he/she would assess

what he/she was good at in the given lesson, where he/she made mistakes and what has to be done in the future.

**Social and personal competence mainly** concerns life in society and life with oneself. Pupil should be capable of reasonable acceptance of oneself, to form good human relationships, express empathy etc. This competence can be formed only during instruction which allows communication between pupils. All forms of group teaching are appropriate. Pupil should try different positions in a working group. This competence can be interconnected within Romani language with various themes (appearance and character of person, health, values, leisure time etc.). Within this competence teacher should also support healthy self-assessment of pupils.

### **3 Means of language and their practice**

The basis for Romani language teaching is to develop all four language skills. In order to fulfil this goal it is necessary that pupils acquire respective language means, that means practicing of phonetic, graphic and orthographic, lexical and grammar phenomena. Language competence (includes language understanding and related knowledge), speech competence (includes habits and skills which serve to ensure the right assembly of speech according to certain rules) and communicative competence which is reflected in communication with others and includes speaking skills.

The instruction should ensure that pupil has a command of both language and speech competence to communicate with others in Romani language in the right way.

### **4 Graphic tools and their practice**

Graphics and orthography are expressed in written form of communication. They are, thus, important mainly for writing. Graphics can be described as a set of graphic signs and shapes thanks to which we can transfer oral speech into writing, or as a system of relationships between signs of alphabet and sounds. It is important that pupils distinguish between two types of writing from the view of pronunciation – phonetic and non-phonetic way. In order to learn **phonetic way** it is important that pupil can mark the sound with the right letter which means he/she has to be able to set apart and analyse individual sounds in the word. If the pupil knows this way very well there is no need to learn all rules of orthography in a complicated manner.

**Non-phonetic way** includes such words in which way of transcript is based on morphological principle, a word is therefore written differently than read. Such words cannot be written as they are heard by pupils, it is necessary to remember certain rules. Teacher should include various types of dictations, at which pupil will practice acquired rules. Verification process is important and should be performed not only by teacher, but also by pupil. He/she should be aware where he/she did a mistake and how should the word be written.

### **5 Lexis practice**

Vocabulary is a set of words of the given language. Vocabulary is a key language tool for practical use of Romani language. Mistakes in vocabulary usually make communication much more difficult than other mistakes.

We can define active vocabulary as words used by pupil without any problems during communication, passive vocabulary includes words understood by pupil during reproduction of text, but not used actively by pupil.

There is a whole series of lexical exercises which focus on repetition of vocabulary, for instance naming objects on pictures, supplementing words or exercises using antonyms. It is useful to use various games, riddles, crossword puzzles to repeat vocabulary.

### **6 Grammar practice**

Traditionally, grammar involves morphology and syntax. New grammar phenomena are usually shown in the text which allows to show the function of the given grammar phenomena in speech. It is recommended to start with initial exercises when pupils get to know the new grammar rule and gradually become aware of it and generalize it. When explaining new material teacher may proceed both inductively and deductively, while both these ways can be combined (from examples to the rule and from the rule to examples). It is also recommended to use visual aids and to support autonomous work of pupils. Deepening of new material follows on the basis of filling various tasks and exercises. The exercises are structured from initial practice to final deepening.

We distinguish three main groups of exercises. The first group includes receptive exercises which focus on recognition, separation and differentiation of grammatical phenomenon. These exercises are connected with reading and listening. The second group includes reproductive exercises in which pupil repeats material which he/she has read or heard before. The last group includes productive exercises in which pupil uses new grammatical phenomenon in his/her own speech (in written or spoken form). This group includes various exercises – removing of brackets, answers to questions, translations etc. An important moment is repetition of acquired knowledge. It can be done in an open or hidden form. The repetition should be on a long-term basis, so that pupils do not forget acquired material.

## **7 *Speech skills and their practice***

### **Listening**

The term listening describes a type of receptive speech activity which essentially consists of perception and understanding (in perception with understanding) of spoken text in Romani. Listening takes part in communication process as a complementary element in dialogue and in form of a separate type of speech activity (e.g. listening to lecture). We speak about direct listening and mediated, synthetic listening and analytical listening. Direct listening is characterized by a direct contact between persons. Mediated (indirect) listening is characterized as listening in which communication process parties are not in direct contact. It is therefore necessary to use technical devices to ensure such listening (CD recorder, TV, interactive board etc.).

An overall goal should be a skill to understand the speech of fast speaking native speakers and the ability to perceive unknown not adapted texts. In order to build this skill with pupils it is necessary to train partial skills including perception of Romani by ear, know language specific features of Romani through texts spoken by native speakers.

### **Reading**

Reading is a speech skill which includes passive knowledge of language means and understanding of graphic text. Reading is described as the easiest skill, since it occurs in favourable conditions (reader determines the pace, he/she can return to information, text is well visible and can be perceived clearly and without mistakes).

The purpose of reading is to detect meaning in read text. In order to achieve that it is necessary to develop reading and understanding technique. Reading also helps to remember better various phenomena (vocabulary, orthography, grammar constructions), it is, therefore, an appropriate tool during instruction.

The texts designed for reading must fulfil a number of criteria. First of all, they must be interesting for pupils in terms of their aesthetic, emotional and ethical aspects and they should allow to perform various communication tasks. In terms of language, texts should enrich pupils by new knowledge in terms of grammar or vocabulary. We can divide texts in terms of character (e.g. specific, artistic), content (descriptive narrative texts), forms (dialogues, monologues) and in terms of their function, texts are divided into artificially drafted, original adapted and original (authentic).

Correct reading means that pupil reads without mistakes in form and content, he/she understands what he/she reads. It is necessary to follow a number of methodological rules in development of this skill. First of all, it is necessary to train both loud and silent reading. Pupils need to learn how to deal with unknown words in text. The following procedure can be applied. In the first step we try to guess the meaning. If it is not possible, pupils try to understand the meaning without this word and if it is not possible, they find the word in a dictionary. It is further recommended that pupils try all types of reading and gradually guide them to master silent reading at which they could identify the meaning of the text without translation. Pupils should also learn to interpret various texts and teacher should motivate them to read outside of the classroom as well (for instance Roma fairy tales, Roma stories).

**Reading** skill can be developed with help of various exercises. Preparatory exercises help to develop reading technique, understanding, ability to guess meaning of words, or work with a dictionary. After reading of text it is appropriate to include exercises in which pupils work with obtained information enabling, thus, teacher to verify whether they understand the text. According to the nature of the text and determined goal reader is able to interpret communication purpose of the author of the text and can process information obtained by reading.

## Oral expression

Oral expression is a speech skill which serves to express thoughts in communication process with help of means of language in form of sound. It concerns, thus, a speech production, or productive skill. It is the most difficult speech skill. Pupil can use only those means of language which he/she actively acquired. He/she faces high demands (fluency and reasonable speed) and conditions at which oral expression is performed are also difficult. A necessary condition for development of oral expression is an active acquisition of a sufficient repertoire of language means. The use of language means must achieve a certain degree of autonomy. It is, therefore, necessary that pupils purposefully develop their oral expression with help of a developed system of various exercises. The success of this active mastery depends on individuality of each pupil which can be linked to the age and situation and topic which determine the nature of communication. Oral expression is done in various forms.

**Monologue** is described as an uninterrupted and gradual (logical) and coherent oral expression. **Dialogue** is the most frequent form of oral communication, it is spontaneous and not prepared in advance, participants are in direct contact and a typical feature of dialogue is its situational nature (dialogue takes place in specific time and space).

In order to communicate in dialogue, it is necessary to teach pupils to react adequately to partner's impulses, to sustain dialogue and to make it relevant to the given situation. In order to achieve this aim, teacher can use dialogical texts in the textbook, or texts drafted by teacher and pupils could be also motivated to prepare dialogues by themselves.

To ensure development of oral expression it is necessary for pupils to acquire a basic repertoire of language means (vocabulary and grammar). Moreover, it is necessary to give pupils sufficient space for own expression, to develop monologue as well as dialogue, change various communication situations in instruction. It is also necessary to proceed from less complicated to more complex activities, that means to start with reproduction of learned text, to move gradually to half-productive expression and finally to autonomous oral expression. Various communication games, mainly scenic plays are an appropriate tool for training of expression in dialogue.

## Written expression

**Written expression** represents an indirect contact between participants of communication process, written expression is furthermore characterized by level of detail and completeness of expressed thoughts, fluency and logical completeness. The process of written expression drafting is similar to speaking, there are, however, differences, mainly in the speed of production and awareness (in written expression learner has to focus not only on content but also on language form). In terms of writing expression skill development it is important to follow consistently assignment and task and gradually guide learners to natural expression in Romani language. It is necessary to distinguish between written exercises (when learner fills out an exercise in writing) and exercises which focus on expressing own ideas and opinions.

### III. Innovated language portfolio – Romani language learning

Along with Innovated framework educational program of Romani language, portfolios in Romani language were developed according to language levels A1, A2, B1, B2. The levels specified in language portfolio correspond to the levels of Common European Framework of Reference for Languages: Learning, teaching and assessment (CEFR) – "Common scale of reference levels" introduced by Council of Europe. Basic language user is at language level A1, A2. Independent user is at language level B1, B2.

Innovated language portfolio is a document of Council of Europe which is considered as a personal tool of learner (pupil). The document should serve for development of plurilingualism and learner's intercultural competences who can note in it details of his/her communication language competences, intercultural experience, monitor their development, whether he/she acquires them at school, or elsewhere. Innovated language portfolio reflects Council of Europe objectives to deepen mutual understanding, to develop linguistic and cultural diversity, to develop interest in language learning and to support coherence and transparency in language teaching. Innovated language portfolio consists of three parts.

- Language passport
- Language biography
- Dossier

**Language passport** summarizes language identity of owner and his/her experience with learning and language use. It offers space for its owner for regular recording of his/her proficiency assessment in the language which is based on the principle of CERR self-assessment scale.

**Language biography** accompanies ongoing learning processes and language use and contact with cultural aspects which are connected with these languages. In order to identify education goals and to assess learning results learners can use checklists from communication tasks in form of descriptors in the form "I can". Descriptors are scaled according to CEFR communication levels (A1, A2, B1, B2) and structured according to communication activity (listening, reading, oral expression – monologue, oral expression – dialogue and written expression). Language CV also supports own considerations of learning styles, strategies and intercultural experience.

**Dossier** is an unlimited part of Innovated language portfolio in which learners can put and store their works. Pages with activities are also available, however, the main content of dossier develops in course of study and so each learner has a real file including his/her works. Based on need teachers can freely add new activities, worksheets or other study and published sources into the dossier.

Innovated language portfolio has two main functions:

- Pedagogical function – language learning process is transparent for learners, learner's autonomy is developed;
- Informative function – it means specific recording of communication language activities and strategies of pupil (learner) along with his/her intercultural competences.

#### Use of Innovated language portfolio

Each statement in Innovated language portfolio envisages a study activity (activity connected with learning). Time in which pupils must achieve knowledge at any level will differ significantly. Some pupils will proceed fast in respective skills or topics which are interesting for them. On the other side they may be slower in the field of other skills or various thematic units. Innovated language portfolio is usually used at the end of covered thematic unit. In general, it is recommended to go through the pages of innovated language portfolios every two to four weeks. Teacher can freely move forwards or backwards in pages to use topics, statements (claims) and activities which best fit into the rhythm and focus of instruction.

## IV. Proposal of activities for Romani language lessons

## Prepositions

Anglonava

### 1. Lekhav o phendā romanes

I have four rooms in my house. I have a garden in front of my house. Pictures hang on walls.  
There is a vase with flowers on the table. A black cat crossed the street. I've got a gift for you.  
There is a good relationship between us. I am sitting at the window. She was talking about her life.  
He came back from town. I am pretty after my mother. There is a car in front of the house.  
I go to school by bus.

### 2. Lekhav slovačika

pal o dad, andro čaro, paš o kamind, pre fala, pal o kher, maškar o Roma, pre čar,  
ko phral, andro foros, perdal tute, prekal o drom, tel o bar, tel o mariben, pro gav, pro agor,  
pro šero, andal o gav, pašal o kher, tel jehk čhon, vaš tuke, bi e buťi, ko doktoris

### 3. Phen romanes

in the town, at the table, to the doctor, round the house, on the wall, for you, about life, for food,  
on earth, across water, on the chair, under the stone, between kids, on the grass, without father,  
in one month, across the street, in front of school, without money, in the garden, without work,  
under the tree, on the meadow, in the tram

### 4. Lekhav o phendā romanes

In our village Roma have nice houses. There is a garden in front of each house.  
Father and mother are working in the garden. Our house is big and nice. There is a forest behind our house.  
We have six rooms in our house. In summer we sit on a bank in front of our house.  
We live well in our house. My brother lives in town in a block of flats. He has a large 2 bedroom flat.  
In the living room he has a big sofa, armchair, TV set and a nice carpet on the floor.

### 5. Lekhav o phendā slovačika

Bešav andro foros. Anglo kher man hin bar. Maškar amende hin lačho cirdlīpen. Pro skamind o chaben.

#### Miro papus (authentic text)

Sig tosara, sar mek savore Roma sovna, le čiriklen, le kachňen a le papiňen šundžolas pro plácos, podzekaj šundžolas te bašol rukones, e muchľi pes cirdelas pal o paňi pal o luki upral o veš, andro paňi pes čivkernas o mačhe, o papus uščelas, thovlas jag andro bov. E ora marlas štar ori tosara. Paš e oblaka bešelas pal o skamind, žužarlas o duhanos le koreňendar, aňi les na šundžolas. Daralas, te na amen uštavel. Labarlas e pipa u kerlas andro kher baro khandipen. Sar čuchinlas burňik burňikatar, ta šundžolas dži andro kher, kaj sovahas, bo has les bare zorale mozoli le čokanostar, le silavistar, le kerade trastestar, la phara bučatar. Aľe te amen pohladzinlas, ta avka sar te pororeha.

O baja pro gad has les furt kasimen, pro pindre has les zorale boganči, kaľi cholov, podzekaj has les the labardži le umblavendar, so chučkernas le kerade trastestar, kalo brušlikos, pro šero stadi.

O khamoro mek na has avri, jov imar kerlas jag andre šmikňa. O pišot cirdelas korkoro. Sidžarlas la bučaha, bo tosara avnas o gadže vaš o petala, vaš o lanci, kerekri pro verdan, vaš o vidli, pluhi, brani, lopati, krumpača, kosi he aver trastuňi buči. Phirnas ke leste o gadže pal o štar pandž gava, bo aver kovačis na has.

Dzekana šunavas, sar o papus kerlas bida, hoj hin les but buči. Phenlas: „Ta s'oda kada hin? Jon man kamen te thovel andre phuv, či so?“ E baba leske phenlas: „Sem av rado, hoj hin tut buči! Dikh, keci čhave hin! Kampel te chal!“ O papus lake: „Nane mange aňi ko te demavel pre kat.“ U vičinlas la baba: „Av het, av mange te demavel!“ E baba džanelas igen te marel. O čokanos mukhelas rovno pre kat, pekelas jekhvar, duvar – o trast has prečhindo.

Buči has pherdo, o pluhi, o brani has všadzik, na has kaj pes te rušinel. O papus lelas vaš jekh pluhos pandžšel koruni. Te has bareder, ta he buter. Varekana oda has bare love. Šaj cindžas palal calone bales.

Sar has e buči kisňi, ta bičavlas o papus la baba pal o gadžo, kaj te avel andre šmikňa. „Dža imar, bo phendžas, kaj dela chaben!“ E baba anelas andre zajda balevas, mas, maro, jaro, gruľi, žiros. Jekhevaste haľikerlas e zajda, andre aver vast has lake o kangľikos le thudeha. Ledva doavla khore. Dural vičinlas pro papus: „Muleja, ta kaj sal? Sem av manete pomožinel!“ Mukhelas savoro a prastalas, lelas latar e zajda. „Ta kaj tu kada šaj doľidžas! Sem oda hin baro pharipen! Na mušindžal te lel savoro jekhvar!“

O gadžo avlas pal o papus a mangelas pes, kaj leske te kerel e buči. „Ja nemam čas. Nemam kedy, mam veľo roboty.“ O gadžo: „Jaj, Lisu, ta dze pujdzem? Až do Levoči? Preboha ce pytam, sprav mi to!“ – a anglal delas balevas, Ľitra paľenka. O papus aňi na dikhelas oja sera. O gadžo lelas avri o love a delas. O papus phenlas: „No dobre,“ thovlas les kijo pišot te phurdel, mek leske marlas pro kat le čokanoha a kerlas leha buči. Calo džives.

Le papus has andro kher chaben, love, savorestar dost.

Aľe sar na has buči, ta phenlas: „Kaj ole gadže? Soven či so? Ňiko na avel, ta s'oda?“ E baba phenlas: „Sar tut nane buči, keres bida. Hin tut buči, tiš keres bida. Ta so kames? Beš tele, sem avena!“ O papus labarlas e pipa u šunlas o radios paš o skamind. O radios has ajso baro, hoj na has kaj te thovel taňiris.

Has baro bučakro a igen chirno kovačis. So kampelas trastestar te kerel, ta kerlas. Kerdžahas he suv.

Džanelas he te vrasarel o trast jekhetane kija peste. Kerlas oda mek feder sar adadžives autogenoha, bo has baro fifikos. Lelas andal e fala, andal o muros šuki čik, pal e phuv prachos pre blachica. O trast rozlabarlas, has calkom lolo he kovlo, lelas e čikori, o prachocis a čivlas andre jag pro trast. Savoro pes zlejinlas dokupi, sar te oda kerdžahas o del. Paľis lelas avri o trast andal e jag a imar ča randelas le riňineha e troska palal tele. Ňiko na prindžarlas, hoj oda has duj kotera, a Ňiko na džanel, sar mro papus kija kada avľas.

Le Romenge kerlas tiš, so kampelas: či lancos pro vudar, či petľica, či čopos, o tover pocirdelas, romane karfina kerlas. A tiš džanelas te petalunel le guruven – ča pro jepaš petalos pre avruňi sera. Sa o gadže phirnas kija leste, bo oda džanelas te kerel ča jov.

Džanelas tiš te strihinel. Savore gadže phirnas kija leste. Terdžonas tel e fala abo bešenas pre phuv, užarnas pre šora – a khandenas. O papus sidžarlas te strihinel, bo has but džene. Save has strihimen, ta has lenge o šere sar klončki. Na džanas pašal o papus jekhetane, aľe pal peste sar papiňa. O Roma lendar počoral asanas, o papus tiš, aľe strihinelas dureder. Varesave gadže počinenas lovenca, varesave pes strihinenas pro pačaben, aver anenas paľenka, čhil, maro, balevas. O bavelas na has kaj te rakinel, ta e baba figinlas pro pados pro šuňuris.

Le gadžen has le papustar bari chasna. Džanelas he te bašavel pre lavuta. Has les banda peskere čavendar he le Romendar. Phirlas te bašavel le gadženge. Sar les dikhenas, ta phenenas: „Jaj, vitaj, Lisu.“ Has bare rade, sar šunenas les te bašavel. Bašavlas lenge kovaľsko gili a marlas pal e lavuta andro tempos, hoj šundžolas, sar te mardžahas čokanoha pal e kovinca. Imar has pal o gadže.

Všadzik, kaj avelas, denas les bari pačiv. Sar muļa, ta avle pro pohrebos but Roma, but gadže, hoj na dičolas pro paluno agor. O gadže andal o gav has savore, o Roma tiš. Jekh jakh n'ačhlā šuki. Rovnas savore.

Te phirdžahas momeļaha agor svetos, ta kajse kovačis ňikaj n'arakhľahas. Chibinlas amenge. A le gadženge tiš. Andro gav les leperen dži do adadžives.

#### **So hin tateder, chevalo gad vaj kožuchos?**

Tu phenes, hoj kožuchos hin tateder sar chevalo gad. Ma paňa. O Bertis le Sidorendar tuke phenela, sar oda hin.

Esas jevend, baro šil. O Rom Janči džal dromeha, pre leste ča chevalo gad. Gilavel peske, khelel, kaj les te jel tateder. Angle leste avel o grofos pre koča. Kožuchos, tate ciracha, šala, taťi čapka, mek the avka izdral andro šil. Dikhel, dikhel, kada Cigan nango pindrango, ča chevalo gadoro pre leste u mek peske khelel.

„Sar oda, more, hoj tut nane šil?“ phučel o grofos le Romestar.

„Bo pre mande urđom chevalo gad, grofona,“ phenel o Janči.

„Ma vaker diliňipen! T'oda mek goreder šil andro chevalo gad, na!“ phenel o grofos.

„Ta kaj!“ phenel o Janči – b'oda sas baro špekulantos! – „oda hin avka: o šil avel jekha chevaha andre, avra chevaha džal avri. Tumenca o šila maren, bo pes l'ikeren tel o kožuchos, nane len khatar avri te džal.“

„Sluchaj tu, Cigan, na dehas man tiro chevalo gad?“ phenel o grofos.

„Dás les tumen, grofona, dás les tumen le jilestar, aľe naští.“

„Soske?“

„Šaj me phirav bi gadeskero? Nango? Sem oda ladž.“

„Džanes so, me tut dava miro kožuchos, tu man deha tiro gad.“

„Ta te avka,“ phenel o Rom, „mi jel.“ Čhiďa pal peste tele peskero chevalo gad, diňa les le grofoske, iľa pre peste le grofoskero kožuchos – denaš! Denašel khore, kaj les te n'avel šil andre le grofoskero kožuchos.

Dojekh nacija hin peskere tradiciji the andro uraviben. The oda but phenel pal e nacija. Kana džal pal o Roma, sas oda avka, kaj o murša urenas gada the cholov. Pro gad lajbikos, vaj gerekos, pro šero stadí. Pro pindre urenas ciracha, vaj kamašli. O džuvla urenas d'indarde rokli, b'luzi u pašal peste phandenas pochtan, vaj bare khosne. O phureder džuvla na phandenas o khosno tel e brada, aše palal šereste. Le Romegero uraviben na sas jekh, buterval džalas avri olestar, so len denas o gadže. Gada len denas vaš e buťi so ke lende kereras, vaj akor, kana lenge imar o purane gada na kampelas. No the avke pes o Roma rado barikaňarenas. O džuvla rado thovenas andro bala čati, the andro meňa mirikle, vaj brezleti pro vasta. Varesave džuvla hordinenas rokli andral žebenca. Andro žebi thovenas oda, so mangenas avri le gadžendar, abo so chudenas vaš e buťi ko gadže. Ajsi rokla pes vičinelas „romaňi/ciganska.“ Romane lavutara bašavenas bare barvale gadženge andro khera the andro bišto šelberš andro kavehazi u lengero uraviben sas aver. Le kraľiskero phuro papus ačhiľa džido. Vičinenas les Sapale Jakha. O Sapale Jakha džanelas oda, so čirla džanenas savore Roma: o sapa les sikhade te chal ajse draba, so učharen manušeskeri parsuna avka, hoj les ňiko nastí dikhel.

O Sapale Jakha učhardo le slugadžengere jakhendar, dikhelas dukhade jileha, so ola benga keren. Raťi, kana o slugadža sovenas, počoral stradňa jekhetane savore Romen, so mek ačhile džide: „Romale, čhavale, adaj naští ačhuvas. Vaj amen o bibachtale murdarena, vaj meraha bokhate, vaj amen kerena dasenge. Len tumenge, so amenge kampela pro drom. Kas hin somnakaj, len somnakaj, bo hin kuč u nane pharo, del pes šukares te hordinel. Ko džanel te bašavel, len tumenca tumare bašaďa. Savore manuša pro svetos kamen te šunel bašaviben. Oleha šaj rodas maro. Ko džanel charťiko buťi te kerel, len tumare svirinda – chartíko buťi sajekh manušenge kampel. Sig, siďaras adari – e phuv amari, imar nane amari. O Del dela, hoj varesar ela.“

Sar o Sapale Jakha phend'a, avka kerde. Sako pes cirdelas sar sap kij'oda, so ačhiľa leskere kherestar, lelas, so reselas. Lokores, kaj te na uštaven le slugadžen, avenas o Roma pale kijo Sapale Jakha. Avka pen mukhle pro baro drom.

O Roma džan, bokh pes pal lende cirdel phares, giľaven – romaňi giľi, tu dukhado jilo sasťares! Sar avel rat, o jaga thoven, kaj pes del, keren penge than, sar o kham avel avri, pro drom pen mukhen, džan, džan, džan.

Putinen, vandrinen, soča o cerhi rozthoven, imar o šingune aven: „Kadaj nane tumari phuv!“ Traden le Romes, sar te na uľahas manuš, sar te uľahas ruv.

O Roma džanas dur, dur, džanas pal o kham. O Sapale Jakha imar čirla muľas, bo leske sas buter sar šel berš. Aľe o Roma ľikerenas leskere god'aver lava andro jilo. Čačo les sas, hoj bašavibnaha the charťikona buťaha rodenas penge choča ajci maro, hoj na merenas bokhatar.

Dromeħa arakhenas sojegaver manušen. Sako pes uravelas pal aver moda, sako vakerelas aver čhib.

Pal o but berš avle o Roma maškar ajse manuša, so sas parne. Dikhenas pre lende porade jakhanca, o parne, so pre lende o Roma thode nav „gadže“ – dikhenas porade jakhanca pro kale Roma. Daranas lendar, paťanas, hoj hine le Tatarendere štarejakhengere. Lenas le Romen palal, tradenas len avri andal pengere fori.

O Roma leperenas sajekh, so len o Sapale Jakha delas god'i. „Džan vešenca, čhavale, ma džan andro foros, o šingune tumen marna, murdarna.

Kana o Sapale Jakha muľa, ľidžalas le Romen o phuro Sidoris. Jekhvar ke leste avle prastandos štar ternechara, phurdenas sar pišot. „Vajdo, amen dikhľam baro foros. Rajkaňi diz! Bizo odoj bešel o kraľis. Avas odoj, džas te dikhel!“

„Čhavale, na džanen tumen, so amenge phenelas so Sapale Jakha? Kaj te na džan andro fori!“

O čhave mukhle tele o jakha. Kampel kan te del, so o phuro phenel. O phure chale buter maro.

„Bešaha amenge tel o veš,“ phend'a o Sidoris. „O Romňa phirena pal o churde gava, bikenena o charťika buťa. Te dela o Del, vareko avela amen te pojedňinel, kaj leske te bašavas.“

Mukhle pen te džal vešeha. Džanas ta džanas, jekhvar avle kijo than, kaj sas kerekate o kašta peravkerde. Maškaral o nango than sas kedvešno bazenos. Andral sas murimen avri kuč barensa, o paňi andre sas žužo sar apsa. O terne kamenas odoj te ačhel, bo o than sas prekedvešno. O phure phende: „Na avas, džas dureder, ko džanel, kaskero oda bazonos hin.“

Džanas dureder. O Sidoris le Romen ačhaďa pro thanoro, kaj džalas šukar, žuži leňori. „Adaj ačhuvaha paru d'ivesa, bo savore sam strapinen, khiňuvaha amenge čino avri.“

#### **E BETA (authentic text)**

Sar somas mek terňi čhajori, phiravas man te sikhavel Přelučiste u arakhľom man pro foros jekha Romňaha, Beta pes vičinlas. E Beta man iľa khore andre peskero kher. Me ke Beta rado phiravas, bo mange vakerlas paramisa. Varekana mange phendá šukar paramisi, varekana ajse paramisa, hoj latar daravas.

Vakerlas mange tiš, sar bešelas Choltícate andro veš u sar čorikanes dživenas. Rado pal late odoj phirenas o Roma, aľe the o gadže. Jekhvar pal late avľa e učiteľka – sikhľardí, so sikhavelas lakera čha. Narado phirelas e čhaj andre škola.

E Beta pekelas pre mašina marikľa, aľe sar dikhľa la učiteľka, but pes ladžalas, hoj andre ladž na kamelas e marikľi te visarel. E sikhľardí ňisostar ňič gejľa ke mašina u e marikľi visardá. E Beta radisaľila u nukindás la te lel marikľi. E sikhľardí na džungľiľa u chaľa e marikľi. No u paľis e Beta rado bičhavelas peskera čha andre škola.

Šunen, so mange e Beta vakerlas mek, talam the sikra darana.

Sas duj prala. O phureder phral peske iľa lačha romňa, žuža, džanelas mištes te tavel, te ušanel, te pratinel. Aľe o terneder phral peske iľa – no našti phenav, hoj sas meľaľi, oda na, aľe kerelas buťi, kana pes lake kamelas. Lakero rom lake phenlas. „Dikh pre šougorkiňa! Kanakam džav ko phral, hin leskera romňake o kher pratimen u the tado chaben. Dikh, tu ča bešes khore u o naja lagines!“

Oda lake phenlas the lakeri sasuj. E terňi bori chalas bari choľi pre peskeri šougorkiňa – he la pokerďas. Pokerďas la, kaj te na dikhel. Ňič na dikhelas, našti pratinlas, našti tavlas. Savore pre late rovenas. Geľa laha e sasuj ko doktoris a o doktoris lake phendá: „*S tou vaší nemocí se nedá nic dělat. Stává se někdy, že člověk z něčeho nic najednou oslepne. Někdy natrvalo, někdy nevidí jen nějaký čas.*“

Sar kada šundá e sasuj, gejľa ko vrašťos u sa phendá leske, so pes ačhiľa.

O vrašťos lake phendás: „Phuč la terňa boratar, so kerďa la phura borake. U oda, so kerďa, mi previsarel.“

Soča e sasuj avľa khore, phučel la ternederatar, so kerďa la phurederake. E terňi bori but rovelas u sa la sasake čačipen phendás: hoj iľa džidona žamba u zasiďa lake o jakha. Vaš oda lakeri šougorkiňa akana na dikhel. (Phendomas me tumenge, savo mek džungaľipen adi romňi kerďa, aľe ada me mukhav kija ma. Na hoj tumenge, nipale, te avel pre godňi ajse džungale veci te kerel! Oda pes amare Devleske na pačinel! Ma bisteren, hoj o Del phendás: ‚Kam avre manušes avka sar korkores tut.‘)

E sasuj phučel, kaj e žamba. E bori phenel: „Denašťa mange andal o caklos u me akana na džanav, so te kerel.“

E sasuj phenel: „Musaj te chudes aver žamba, musaj lake te zasives o jakha u paľis lake o jakha polokores te phundraves.“

Avke oda e terňi bori kerďas u e phureder bori imar dikhelas. Mek e terňi bori geľa ke peskeri šougorkiňa u the pes lake šukares mangelas. Iľa vera, hoj imar ňigda šoha ňikaske ňič džungalo na kerela. E phureder šougorkiňa lake odmukľa u šukares jekh avreha savore dživenas.

#### Miro čhavorikano dživipen (authentic text)

Miro čhavorino dživipen pregejla sar o paňi tele le heđoha. Peršo, so mange avel pre godi, hiňi miri somnakuňi baba the o papus. Dživavas lenca ciknorestar. Mek mange na has trin berš, sar e daj iľa avre romes, bo mire dadeha na dživelas. E baba man imar laha na mukhla, bo daralas, hoj man lakero rom na kamela. E baba, sar has manca e daj phari, man imar andro per vičinelas chrapunko.

E baba the o papus man igen kamenas the na has ňič, so predal mande na kerdehas. E baba man hordinelas andre zajda pro dumo the akor, sar somas bareder. No somas varesavi šukori abo nasvali, somas ľolečhamengeri čhajori, sar phenelas e baba – chrapunka. Na džanav soske, e baba has pre mande igen barikaňi.

Has la duj čhave, e daj the miro bačis, o Barovčakos. Le papus tiš vičinenas Barovčak. Le bačis e baba igen kamelas u la da na kamelas, bo marelas pro papus. Man kamenas soduj džene avka, hoj pen predal mande halasinenas. Jekhvar mange cinelas vareso e baba, paľis o papus.

Ta dživavas paš lende the has man igen lačho dživipen. Bešahas andro cikno forocis maškar o gadže, dikhavas ciknorestar soduj kulturi, bo o gadže man lenas ke pende, bavinenas pen manca, hordinenas mange o čački, o uraviben, bo samas čore. O papus chudelas varesavo cikno dvochodkos, bo has nasvalo pro buke, the paš oda phirelas pal o gava the cinkerkelras avri o morča pal o džvirini. Varekana anelas khore zajacos/šošojis, jekhvar amen has the buzni. E baba phirelas andre buťi, pro stavbi, pratinelas pal o murara, o blaki, o vudara, has la but phari buťi. Phirelas le podníkoha upre tele pal calo okresis, bo jekhvar kerendas andre kada foros, jekhvar andre aver.

U me baruvavas, bavinavas man le čhavorenca pre ulica, phiravas lenca andre školka the paľis andre škola. Gadžikane čhavore man lenas maškar pende. Samas savore ajse čoreder. Vareko anelas purano biciglos u phirahas pre leste savore. Sar samas bareder, ta phirahas pro kupaľiskos. Peršo džahas andro veš pro borovki. Ha ha, akor molas o kupaliskos duj koruni.

Avahas khore kijaraťate sako d'ives. Melala, ľimali, no spokojno. Romano dživipen dikhavas akor, sar džavas la babaha pal o bačis. Bešelas amendar dur andro foros pre Morava. Has les efta čhave u andro foros bešelas leskera romňakeri fameľija. Odoj dikhavas ciknorestar romane bijava, boňa, Karačoňa. But rado odoj phiravas, kamavas la biba, has igen šukar the lačhi. O bačis čoro muľa, sar leske has penda berš, the e bibi ačhiľa dži akana korkori. Pačisaľolas pes mange, sar bajnelas pal o čhavore, te ke late avavas khore, ta dikhavas ča o žužipen. Paš oda mek e bibi asalas, šukares giľavelas, has igen lačhi džuvľi. Vičinenas la Puľa.

E baba le papuha paľis imar na dživelas, bo o papus phirelas pal o džuvľija. Has les varesavi džuvľi andro aver gav, ta gejla pal late. Amen la babaha ačhiľam korkore. Akor mange has vaj ochto berš. E baba man delas andre družina the sar avelas andal e buťi, ta man lelas u džalas manca khore. Pal o drom mange andro bufetos cinelas zumin, khore mange makhelas o maro u džahas te sovel, bo lake kampelas sig tosara te džal pale andre buťi. Čorikano dživipen. Čorikano, ale andro kamiben.

Sar man has o prazdñini, ta furt vareso špekulinavas. Jekha raklora ha amege phendam, hoj amenge džaha te kerel o piknikos. Thođam amenge andro taški o gruľi, o švabliky, varesavo maro, lepeda the pal o dilos gejľam le autobusiha andro gav, kaj bešelas miri daj. Phirahas pal o veš, rodahas amenge lačho than, rodahas o kozara. Akana šundam varesave motora. Gejľam te dikhel the dikhas, hoj pal o drom džan but motora, o tanki, upre le vešeha džan o slugadža. Darandžam, gejľam amen te garuvel. O motora džanas prosto le dromeħa, kaj bešelas miri daj. Imar has čeporo šišitno, ta daravas pal oda drom te džal khore. Na džanahas, so te kerel. Soduj džeňa rovahas, samas garude tel e smerčina. Paľis avľam odarig avri the terďuvahas paš ajso baro stromos. Ňisostar ňič amen vareko chudel le phikendar: „Holky jedny nezbedný, co tady děláte?“ Chudľam la raklora ha te kerel ajsi vika, hoj amen dukhalas andro kirlo. Paľis me phenav: „My tady stanujeme.“

„Co vás to napadlo? Tohle je okupace, jsou to ruský vojáci.“ Ta akorestar džanav, s'oda hine okupacija.

E baba the la raklora keri daj amen imar rodenas. Gejle ko šingune the phende lenge, hoj amem pes našadám. Akor mek na has o telefoni sar akana, ta ňiko lenge našti vičinelas. La babake avla pre godi, či na gejľam ke miri daj. O hajníkos amenza imar džalas andal o veš the paš la dakero kher imar terďonas o šingune le motoriha. Thode amen andro motoris the ľigende amen khore.

E raklori prosto ko šingune pre bul. Lakeri daj pre late igen rušelas, rakinelas, mard'a la. The miri baba, sar man dikhla, ta ča phenel: „Evičko miri, s'oda tu paratines?“

**Topic:** Naming domestic and free living animals

**Language level:** A1

**Age category:** 6 – 11

**Year:** second (primary education)

**Drafted by:** Eva Gašparová

#### Goals:

##### Education goals:

- acquire knowledge about care and protection of animals;
- develop a positive relationship with nature among pupils.

##### Educational goals:

- know how to name some domestic and free living animals;
- acquire knowledge from history, to know of the importance of nature in Roma culture and close relationship of Roma life with nature and animals in the past;
- learn a little dance, find orientation in space.

#### Methods and forms:

- motivational interview;
- collective work;
- song;
- pexeso (find pairs) game.

#### Teaching aids:

- cards with names of animals and cards with their pictures.

## Methodology:

Greeting/*Lačho d'ives.*

Introducing the topic of the lesson to pupils.

Sikhľuvne, adad'ives sikhľuvaha sar pen vičinen varesave džviri, save l'ikeras khore, save l'ikeren o chulaja the sar pen vičinen o voľno dživipnaskere džviri./*Pupils, today we shall learn names of some domestic, economic and free living animals.*

## Main part

### Phase 1 – motivation:

Teacher starts a motivational interview with pupils about animals which they breed at home.

Teacher asks pupils whether they know a well-known Roma song *Odi kaľi mačkica* and asks pupils to form a circle and take hands. Pupils sing a song ***Odi kaľi mačkica*** and at the same time they dance on the circumference.

#### Auxiliary questions:

1. Sikhľuvne, hin khore varekas varesavo džviros?/*Pupils, does anybody have a pet at home?*
2. Sar pes vičnel?/*What is its name?*
3. So džanes pal leste te phenel?/*What can you tell about it?*
4. Prindžaren e gíli ***Odi kaľi mačkica?***/*Do you know the song **That black little cat?***
5. Savo džviros pes andre gíli leperel?/*What animal is mentioned in the song?*

7. Giľavas penge e gíli u paše probaľinas the te khelel./*Let us sing the song and let us try to dance.*

## Phase 2 – exposition:

Say together all names of animals which children know and write them on the blackboard. Divide them into groups e.g. domestic, economic, free living animals etc.  
 Show pupils cards with pictures and ask them to find words on the blackboard.  
 Make sure pupils know pronunciation of all words.

### Auxiliary questions:

1. Sikhluvne, save džviri prindžaren?/*Pupils, what animals do you know?*
2. Phenen lengere nava u lekhaven len pre tabuľa./*Name them and write them on the blackboard.*
3. Save džviri hine kherutne, save hine chulajengere u save hine voľno dživipnaskere džviri?/*Which animals are domestic, economic and which are free living animals?*
4. Dikhen pro čitro u phenen savo džviros hin pro čitro. Arakhen lačho nav pre tabuľa./*Name the animal which you see in the picture and find the right name on the blackboard.*

## Phase 3 – fixation:

Play pexeso (pick a pair) game with pupils. Put cards on the table with pictures and words face down – cards with pictures on one side, cards with words on the other side. Ask pupils to come to the table. Pupils turn one card on each side. If they find a word which answers the question, they take both cards and put them next to each other face up.

If the word does not correspond to the picture, pupil turns the cards back and next pupil will take his/her turn.

### Bavinaha pekseso/Let us play pexeso

Ke kartici le džviroskere čitroha rodena e kartica le džviroskere naveha./*Find a card with correct name of animal along with cards with pictures of animals.*

## Phase 4 – diagnostics:

Teacher makes a verbal assessment of the lesson with pupils and assigns homework.  
*Homework* – pupils copy text of rhyme from the blackboard and learn it at home.

### Helping questions:

1. Pal soste adadives vakerahas?/*What have we talked about today?*
2. Save neve lava sikhliam?/*What new words have we learned today?*
3. Sar pes phenel romanes...?/*How do you say in Romani...?*
